Additional Information regarding EDIS:

EDIS works with a variety of community agencies through our Intercomponent Coordinating Council (ICC), which families are encouraged to attend. We address issues that families have with any number of things such as toilet training, sleep schedules, nutrition, haircuts, swim lessons, library (offered activities), etc. We try to meet the families' needs through our ICC by either helping the family get to the service they need or offering brief discussions on the services available in the community. The community has a variety of ABA services and psychologists that evaluate children with suspected ASD.
